Clifton, New Jersey 07011 | (646)678-7663 | mkpatel4102@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION:

Montclair State University (GPA: 4.0/4.0)	September 2024 - May 2026
Master of Science: Data Science	
CVM University (GPA: 3.58/4.0)	June 2020 - March 2024
Bachelor of Engineering: Information Technology	

TECHNICAL SKILLS:

- Programming languages: Python, SQL, R, DAX, Power Query
- Tools: Tableau, MS Excel (VLOOKUP, Pivot Tables), MS Power BI, ArcGIS, dbt, Looker Studio
- Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, ArcPy, Folium, Plotly, Google Gemini, Anthropic API
- Database and Cloud: MySQL, Oracle, SQLite, Data Lake, PostgreSQL, Google BigQuery, Google Cloud

WORK EXPERIENCE:

Data Analyst Intern (MTA - Metropolitan Transportation Authority)	October 2025 - May 2026
• Automated data processing and data validation of vendor-provided data for 8,500+ events using Python and Office Scripts, identifying and correcting inaccuracies to improve overall data quality. • Managed and improved master data for 1,400+ bus routes using SQL and Excel; performed ArcGIS-based spatial analysis to identify route overlaps and improve operational efficiency. • Designed a Python computer vision pipeline to detect bus lane and bus stop violations from 900+ traffic cameras, achieving 92% detection accuracy; integrated results with Tableau dashboards to visualize violation trends for accurate ticket issuance. • Built a Python ETL workflow to process driver trip logs, calculating pull-in/pull-out counts per depot at 30-minute intervals to optimize fleet planning, maintenance schedules, and backup coordination.	
Graduate Research Assistant (Montclair State University)	August 2025 - May 2026
• Standardized and governed institution-wide student master data (8,000+ records) using SQL and spreadsheets for federal compliance, institutional research, and governmental regulatory reporting. • Created Tableau dashboards to analyze 5+ years of student data across enrollment, financial aid, and academic outcomes; presented KPI trends and performance reporting insights to stakeholders for leadership review.	
Data Analyst (Montclair State University)	April 2025 - August 2025
• Streamlined the data cleaning process, reducing processing time by 30%, and structured raw data into categorized community partners, focus areas, and population segments for targeted impact analysis. • Developed an interactive Python map and Power BI dashboards to analyze 150+ community investment activities, visualize top-performing initiatives, track month-wise trends, and identify key regions for targeted investment.	

PROJECT DETAILS:

E-Commerce Customer Analytics Pipeline (GitHub) (Dashboard)	May 2026
• Built a 5-model dbt pipeline on BigQuery covering GA4 event schema modeling, behavioral segmentation across 269K users, and cross-source identity resolution, replicating core Segment CDP functionality. • Identified 9,630 cart abandonment targets via GA4 UNNEST queries on nested event_params; simulated Klaviyo-style recovery campaign using date-split A/B methodology, projecting 23% recovery rate vs 8% baseline and \$25K incremental revenue; visualized results in Looker Studio dashboard.	
Sales and Demand Forecasting (GitHub) (Dashboard)	November 2023
• Designed and fine-tuned ARIMA and SARIMA models in Python to forecast 6-month revenue for 25,432 products across 12 regions, achieving 94% accuracy and enabling optimized inventory planning. • Identified top 20% of customers contributing 62% of total revenue and top-performing products; developed interactive Tableau and Power BI dashboards visualizing revenue trends, seasonal patterns, and key KPIs, enabled data-driven pricing and promotion strategies.	

EXTRACURRICULAR ACTIVITIES:

Research Volunteer (Montclair State University)	November 2024
• Processed NJ weather data (1915-2024) and contributed to research showing ARIMA, SARIMA models outperform deep learning methods in time and space efficiency for time-series forecasting.	

CERTIFICATIONS:

- Data Science Fundamentals for Data Analysts by Databricks ([Certificate](#))
- Microsoft 365 Fundamentals ([Certificate](#))
- Machine Learning with Python by IBM ([Certificate](#))
- Introduction to Applied Business Analytics by University of Illinois ([Certificate](#))
